

Jenna MacLaine is a truly inspiring leader whose passion, vision, and dedication have left an indelible mark on the medical radiation technology profession both provincially and nationally.

Jenna exemplifies leadership beyond boundaries, proving that geography is no barrier to making a profound impact. As a senior radiological technologist at Thompson General Hospital, she combines clinical excellence with tireless advocacy and mentorship.

Her extensive service within MAMRT and CAMRT- including roles as president of both associations, reflects her unwavering commitment to advancing our profession. Jenna leads with inclusiveness, fostering collaboration, and encouraging the next generation through mentorship and leadership development initiatives.

Her contributions extend internationally through meaningful outreach, such as her work with Rad-Aid in Tanzania, and locally through her role as a clinical instructor, shaping future technologists with compassion and expertise.

Jenna's leadership is also grounded in professional excellence, demonstrated by her CAMRT Fellowship, impactful research on weight stigma and virtual reality in healthcare training, and ongoing pursuit of education in ethical care, mental health and cultural safety.

Most notably, Jenna embodies the spirit of what the Rita Eyer Leadership Award stands for – leading not for recognition, but with a pioneering spirit and genuine passion to better serve patients, colleagues and the profession.
